## SPRING 2019

---

The spring semester is upon us! It's hard to believe we are already halfway through the school year. For some of our students this spring semester is bittersweet. They know that their time here is coming to an end and that they will be moving on, but there is also excitement for their future and what it holds. At George Fox we strive to know our students by name, to understand, value and uplift each individual so that when their time here is done, they will know what our promise truly means, to Be Known. Come join us as we embark on the second half of the 2018-19 year. Our events are enclosed. There is so much still to do, to learn and to celebrate!

Yet now, the value of science is being challenged like never before. For no topic is this more important than climate change, which poses an immediate threat to our civilization. Against a backdrop of climate change science, Lindroth will explore the fundamental premises of science, why they predispose science to dismissal and denial, how humans engage with facts, and how to improve science communication across ideological, cultural and tribal divisions for the betterment of humanity and sake of the world.
