

SAFETY PRACTICES - LAMPS, BULBS & SWITCHES

Do NOT leave switches in a middle position. Switches should be either fully on or fully off.

Do NOT cover lamps or lighting with flammable materials (such as scarves).

Do NOT use halogen lamps or lighting, due to the heat they emit. LED lamps and lighting are preferred.

Do NOT discard fluorescent bulbs, as the gas inside is considered hazardous. Place a maintenance request to have Plant Services properly dispose of fluorescent bulbs.

If your overhead light or desk lamp is out, place a maintenance request to have Plant Services replace the bulb.
